What gates are most common in WWTPs?

Water Control Equipment for Water and Wastewater Treatment Plants · https://whipps.com/whipps-inc-water-control-products-faqs/what-gates-are-most-common-in-wwtps/

Slide and sluice gates are the most commonly used gate types in wastewater treatment plants due to their reliability and versatility. At Whipps, Inc., we typically manufacture these gates using our 800 and 900 Series designs, which are engineered to meet the specific flow control needs of WWTP applications.
