What seal materials are safe for drinking water applications?

Water Control Equipment for Water and Wastewater Treatment Plants · https://whipps.com/whipps-inc-water-control-products-faqs/what-seal-materials-are-safe-for-drinking-water-applications/

For drinking water applications, we use seal materials that meet NSF/ANSI 61 standards for potable water safety. UHMW (Ultra-High-Molecular-Weight Polyethylene) seals are a top choice due to their low friction, chemical resistance, and long service life without contaminating water.
